Diversified by Sectors as well as Themes (a Group of Stocks Related by a Common Driver)

Diversified Across at Least Eight Themes

Maximum Theme Exposure of 25%

Maximum Sector Exposure the greater of 25% or +10% over Index

Investment Objective

This strategy's objective is to seek long-term capital appreciation and outperform our peers and the Russell 2500 Growth Index over a market cycle by investing in a diversified SMID growth portfolio.

Strategy

SMID growth portfolios are managed using CCI's **Positive Momentum & Positive Surprise** investment philosophy. This philosophy is based on the belief that *positive momentum* in a company's progress plus *positive surprise* in reported results produces rising stock prices. Simply, when a company is experiencing positive fundamental change in business momentum and is exceeding investor expectations, growth rates will accelerate. This strategy leads to participation in strong secular trends which provide an ideal backdrop for positive momentum and results. The composition of portfolios evolves as holdings are rotated toward areas of high growth and positive surprise.

This material covers general information only and does not take account of any investor's investment objectives or financial situation and should not be construed as specific investment advice, a recommendation, or be relied on in any way as a guarantee, promise, forecast or prediction of future events regarding an investment or the markets in general. The opinions and predictions expressed are subject to change without prior notice. The information presented has been derived from sources believed to be accurate; however, we do not independently verify or guarantee its accuracy or validity. Any reference to a specific investment or security does not constitute a recommendation to buy, sell, or hold such investment or security, nor an indication that the investment manager or its affiliates has recommended a specific security for any client account. Subject to any contrary provisions of applicable law, the investment manager and its affiliates, and their officers, directors, employees, agents, disclaim any express or implied warranty of reliability or accuracy and any responsibility arising in any way (including by reason of negligence) for errors or omissions in the information or data provided.

All figures shown in this document are in US dollars unless otherwise noted. Indices are unmanaged and do not consider fees, expenses and transaction costs are not available for direct investment.

The Russell 2500 Growth Index measures the performance of the small to mid-cap growth segment of the U.S. equity universe. It includes those Russell 2500 companies with higher price-to-book ratios and higher forecasted growth values. The Russell 2500 Growth Index is constructed to provide a comprehensive and unbiased barometer of the small to mid-cap growth market. The Index is completely reconstituted annually to ensure larger stocks do not distort the performance and characteristics of the true small to mid-cap opportunity set and that the represented companies continue to reflect growth characteristics.

Each portfolio included in the composite is managed according to its own individual investment restrictions and limitations and therefore their characteristics may vary from those of the Representative Portfolio shown. Portfolio performance, characteristics and volatility may differ from the benchmark shown. Holdings and weightings are subject to change daily. The holdings listed should not be considered a recommendation to purchase or sell any security and there is no assurance an investment in these securities will be profitable.

Net performance results reflect a reduction for investment advisory fees based on the firm's applicable asset management fee schedule. For the periods from January 1, 2021 through February 28, 2021 composite net returns are calculated by applying the actual fee schedules at the underlying portfolio level. For all other time periods composite net returns are calculated by applying the current highest management fee. Additional information on calculation of composite performance data is available on request. Actual investment advisory fees charged to clients may vary.
